ADD WOOD VENEER WALLCOVERINGS TO YOUR NEXT SURFACE-SCAPE

ARBOR is part of Koroseal's **Specialty** line of wallcovering products. With over 100 species of wood, colors, and cuts, Arbor is a popular choice for any high-quality interior. Arbor wallcoverings are made from the highest grade of wood, many of which can be **FSC certified**. As a pre-finished AA-Architectural grade veneer, Arbor is as easy to install as any wallcovering at a substantial cost savings compared to traditional millwork.

To view our complete line of Arbor products (species, color, and cuts) visit us at koroseal.com/arbor or contact your local sales rep.

Because wood is a natural product, color, tone, and grain configuration may vary from the images shown here.

ENVIRONMENTALLY RESPONSIBLE

Arbor selects tree species that provide a **maximum yield of the highest quality veneer with minimum environmental impact.**

With Arbor's patented process for slicing incredibly thin veneer, each log's yield increases by approximately 300%.

The same volume of veneer that once came from three trees now requires only one.

Safe to your environment:

- contains no added urea formaldehydes
- meets California Indoor Air Quality Specification 01350 as low-emitting wallcoverings
- Class A Fire Rated

A selection of ARBOR Wood Wallcoverings are **FSC** and **Responsible Forestry Certified** to meet your environmental standards.

KEY FEATURES OF ARBOR

- **Pre-finished** and ready to install. No staining or finishing required on the jobsite.
- **AA-Architectural Grade** veneer.
- **Ease of installation**; installs like contract wallcoverings.
- Manufactured to provide stability for **minimal expansion and contraction** caused by seasonal humidity.
- Efficient veneer processes offer exceptional yields. **Fewer hardwood resources** are required compared to solid millwork.
- **ULTRA finish available** for increased durability and abrasion resistance for high traffic areas.
- Multiple **face matching** options available.
- **Custom capabilities** include: digital printing, stains, inlays, sizes, cross graining, end-matching, ceruse/white wash effects, planking, and ULTRA finish for durability and abrasion resistance in high traffic areas.

To view our complete line of Arbor products (species, color, and cuts) visit us at koroseal.com/arbor or contact your local sales rep.

Environmentally Responsible:

- Trees selected for maximum yield, highest quality, and minimum impact
- Patented slicing process increases log yield by approximately 300%
- Contains no added urea formaldehydes
- Meets California Indoor Air Quality Specification 01350 as low-emitting wallcoverings
- Class A Fire Rated
- Select wallcoverings are FSC and Responsible Forestry Certified

Fire Rating:

- ASTM E84: (Flame Spread: 10 / Smoke Developed: 25)
- NFPA Corner Burn Test: Meets requirements for flamespread, smoke developed and flashover.
- Class A Fire-Rated: Standard and Ultra Finish Products

Finish:

- Standard: 2 coat urethane finish with 30% sheen
- Ultra 30: 3 coat urethane finish with 30% sheen (used in high traffic areas)
- Ultra 70: 3 coat urethane finish with 70% sheen (used in high traffic areas)

Size:

- 3'x9' and 3'x10' standard sheets
- Custom sizes available. Inquire with your Koroseal sales representative
